# Поворот судьбы

**I** had drunk too fuck... Drink hairy-body, she along. The Dead Kennedy's elicited a collective "Yup, been there, done that" when they assaulted our gothed hearts with this little ditty in the early 80s.

For us, peering out a couple rows back with a gang out in the back somewhere, then pairing off and hollering in the back seats of various cars and vans was a Saturday-night ritual.

And sometimes you were well, too drunk to fuck.

Drinking and sex go together like fine wine, a roaring fire and two naked bodies, like a pitcher of beer... you and that guy you are not... bar who... like the... each... wash off to.

Ah, the romance of it all. A gentle moist followed by that thing you do when you twist your arms around each other to take a drink, during slutty little suggestions into each other's ears, and then going home and bonking before you pass out.

Sometimes... fuck and something that... get group on its own... the '90s. Why were... as a result it's to... show up at the same... and compare your feelings... in a disorderly... evening. I'm... If you do get... one out on... prefer... a b... c... y... m... tion... other. Al... don't work out, at... bar full of options.

ink so... a... and... that... double vision lets you... sy of having a three... only two of you. If... morning maybe one... remember how great... Of course, it's... until some guy tries... nets as a defence
